This volume deals with strategies aimed at increasing psychological well-being in both clinical and non-clinical settings, with a special focus on the impact of cross-cultural influences on these processes. Consisting of two parts, the book first examines clinical interventions for increasing well-being and positive functioning in adult populations. It looks at cultural differences in the experience of psychological well-being, presents an analysis of the concept of psychological well-being and discusses various interventions, including Well-Being Therapy and Cognitive Behavioral Therapy. Other concepts discussed are post-traumatic growth, wisdom and motivation. The second part of the book deals with psychological interventions in childhood and adolescence and has a strong emphasis on educational settings. It provides an overview of the main evidence-based psychotherapies for affective disorders in youths, and looks at the importance and impact of positive education, resilience, and hope. The book presents models for intervention and discusses several therapies in detail.

This authoritative clinical reference and text--now revised and updated with 50% new content--presents the assessment tools and strategies that every evidence-based psychotherapy practitioner needs. Unlike most assessment texts, the volume is organized around specific clinical problems. It explains how to select and use the best measures to assess clients' symptoms, generate diagnoses, plan appropriate treatments, and monitor progress. Clinician- and student-friendly features include tables comparing and contrasting relevant measures, sample forms, and case examples. Every chapter addresses considerations for primary and managed care settings. New to This Edition *Chapters on new topics: assessment of well-being and transdiagnostic assessment. *New chapters on core topics: eating disorders, personality disorders, and insomnia. *Updated throughout with DSM-5 diagnostic changes, new and updated instruments, current research, and increased attention to transdiagnostic concerns. *Expanded coverage of obsessive-compulsive and related disorders. See also Clinical Handbook of Psychological Disorders, Fifth Edition, edited by David H. Barlow, which presents evidence-based treatments step by step.

This edited volume focuses on both conceptual and practical challenges in measuring well-being. Leveraging insights across diverse disciplines, including psychology, economics, sociology, statistics, public health, theology, and philosophy, contributors consider the philosophical and theological traditions on happiness, well-being and the good life, as well as recent empirical research on well-being and its measurement. The chapters review what is known empirically about how different measures of well-being relate to each other and considers various arguments for and against use of specific measures of well-being in different contexts. Further, the volume includes discussion of how a synthesis of existing research helps us make sense of the proliferation of different measures and concepts within the field, while also foregrounding the insights gained by investigations and conceptual thinking occurring across diverse disciplines.

This edited volume focuses on both conceptual and practical challenges in measuring well-being. Leveraging insights across diverse disciplines, contributors consider the philosophical and theological traditions on happiness, well-being and the good life, as well as recent empirical research on well-being and its measurement.

Edited by the founder of the field, this is the first handbook on positive clinical psychology--a revolutionary approach that places equal importance on both the positive and negative aspects of mental health and well-being. The first handbook on positive clinical psychology, a revolutionary approach that places equal importance on the positive and negative aspects of mental health and well-being Brings together new work from authorities in positive psychology and clinical psychology to offer an integrated examination of well-being as it relates to personality, psychopathology, psychological treatments, and more Discusses theory, research, and practice across a broad range of topics such as optimism, positive affect, well-being therapy, childhood well-being, evolutionary perspectives, and clinical implementation Contains essential information for researchers, instructors and practitioners in clinical psychology, positive psychology, mental health, and well-being in general

We experience here feeling of joy while presenting first issue of 2016. We thank you again researchers who have presented their articles in this issue. This Issue (Volume 3, Issue 2, No. 1) Published, January, 2016

The Sandvik, Diener, and Seidlitz (1993) paper is another that has received widespread attention because it documented the fact that self-report well-being scales correlate with a number of other methods of measuring the same concepts, such as with reports by knowledgeable "informants" (family and friends), experience sampling measurement, and the memory for good versus bad life events. A single factor was found to underlie measures using different methods, and a number of different well-being self-report measures were found to correlate with the non-self-report measures. Thus, although the self-report measures of well-being are imperfect, and can be influenced by response artifacts, they have substantial validity as shown by their correlations with measurements based on alternative methods. Whereas the Pavot and Diener article reviewed the Satisfaction with Life Scale, the Lucas, Diener, and Larsen (2003) paper reviews various approaches to assessing positive emotions. As we wrote in the chapter in this volume in which we present new measures, we do not consider any of the existing measures of positive affect to be entirely acceptable for measuring subjective well-being in the affect area, and that is why we have created and validated a new measure.

The International Journal of Indian Psychology (e-ISSN 2348-5396 | P-ISSN 2349-3429) is an psychological peer-reviewed, academic journal that examines the intersection of Psychology, Education, and Home science. The journal is an international electronic and print journal published in quarterly.
