There is increasing interest in the Asian arena; both as a home for the delivery of international higher education and as a breeding ground for a new brand of sustainable domestic and international growth. Academics are increasingly turning to Asia and Asian Education in order to better understand and predict the emerging trends of global education and this book will serve to provide a forum for debate of this nature. The book provides an insight into the interplay of Asian and European education, identifies the key areas for further development and firmly grounds the approach as one of conversation and dialogue, rather than

one-sided dictation. It also highlights the critical issues within the development of international education, discusses the value and challenges of existing TNE practices as a mechanism to respond to the emerging Asian needs and provides an insight into the future direction of education in the Asian century.

"Nepal has suffered from the lack of proper management of public expenditures, stagnant real revenues, large and inefficient parastatals, and a weak financial sector. Fiduciary risk remains high. His Majesty's Government of Nepal has accorded high priority to the assurance of good accountability and transparency in public sector financial management." "Reforms are now critical and should be approached in an integrated way covering planning, budgeting, accounting, internal control, internal audit, external audit, and oversight. Action in only one area of financial management will not result in the same degree of benefits. The capacity building recommended in this report's Development Action Plan is designed to introduce international accounting and auditing standards in both the public and the private sectors, and to close the gap between precept and practice. The Government has a firm commitment to implement these time-bound actions." --Résumé de l'éditeur.
