Hard math for elementary school is a math enrichment textbook, providing ideas to provide children with lessons that are harder, deeper, and more fun. It has chapters to supplement most textbook topics as well as chapters on topics, such as making polyhedra out of marshmallows and toothpicks, that make the book more fun and develop higher reasoning skills.

Expand your child's math skills at home with Making the Grade Math for Grade 4. Corresponding to state standards for learning, this workbook offers practice for these key skills: multiplication and division, place value and rounding, and fractions and decimals. Easy to use, this math workbook for fourth grade strengthens your child's foundation in math. With Making the Grade Math books, your child will learn, practice, apply, and master basic math skills. The engaging and colorful activities will catch your child's attention while providing quick practice to improve essential math skills. Each workbook in the Making the Grade series contains 48 pages of standards-based activities to support the skills your child is learning in the classroom. The series offers grade-specific titles for these main school subject areas: Reading (PK-Grade 5), Math (PK-Grade 5), Basic Skills (PK-Grade 2), and Handwriting (K-Grade 5). Each book in the series allows your child the independence to practice skills and check work at his own pace using the easy-to-follow instructions and answer key. With the Making the Grade series, you can be sure that you will match the right workbook to your child's needs.

Offers twelve engineering problems to be solved by student teams, with elements of research, writing, mathematics, science, and art required to complete each challenge.

This updated bestseller features new, more focused review material for the leading computer security certification-the Certified Information Systems Security Professional, or CISSP The first book on the market to offer comprehensive review material for the Information Systems Security Engineering Professional (ISSEP) subject concentration, a new CISSP credential that's now required for employees and contractors of the National Security Agency (NSA) and will likely be adopted soon by the FBI, CIA, Department of Defense, and Homeland Security Department The number of CISSPs is expected to grow by fifty percent in 2004 The CD-ROM includes the Boson-powered interactive test engine practice sets for CISSP and ISSEP

Join the Cryptokids as they apply basic mathematics to make and break secret codes. This book has many hands-on activities that have been tested in both classrooms and informal settings. Classic coding methods are discussed, such as Caesar, substitution, Vigenère, and multiplicative ciphers as well as the modern RSA. Math topics covered include: - Addition and Subtraction with, negative numbers, decimals, and percentages - Factorization - Modular Arithmetic - Exponentiation - Prime Numbers - Frequency Analysis. The accompanying workbook, The Cryptoclub Workbook: Using Mathematics to Make and Break Secret Codes provides students with problems related to each section to help them master the concepts introduced throughout the book. A PDF version of the workbook is available at no charge on the download tab, a printed workbook is available for \$19.95 (K00701). The teacher manual can be requested from the publisher by contacting the Academic Sales Manager, Susie Carlisle
