Bmc Captain Diesel
Engine

1.2 litre engines. The
1.2 L (1,199.6 cc)
version was the first
version of the engine.
The bore and the
stroke was 65.5 mm ×
89 mm (2.58 in × 3.50
in). The maximum
power output was 39
bhp (29 kW) at 4300
rpm. After the

The BMC Captain you
have is 36 HP, there
should not be a great
differance in the
engine beds for a
more modern unit,
you might have to
pack it up or down but

Read Book Bmc Captain Diesel

you will be very lucky if another unit fits the existing beds like a glove :-) I would suggest you should be looking at 80 hp for that size vessel.
