Carbohydrates give the body energy. They are in many foods people eat each day. But some carbohydrates are healthier than others. Your Body on Carbohydrates uncovers the nutritional benefits of carbohydrates, how they interact with the body, and how to include them as part of a balanced diet. Easy-to-read text, vivid images, and helpful back matter give readers a clear look at this subject. Features include a table of contents, infographics, a glossary, additional resources, and an index. Aligned to Common Core Standards and correlated to state standards. Core Library is an imprint of Abdo Publishing, a division of ABDO.

Marking the 50th anniversary of an icon of American industry, this book celebrates a half-century of Bobcat with brilliant images of these quintessentially American machines at work, including historical photographs and diagrams, alongside the full story of the only compact machines that have ever mattered. Often imitated but never equaled, the Bobcat skid-steer loader was born when some hardy souls in the Northern Plains needed a new way to get work done. The pictures in these pages show how the Bobcat loader has been moving American industry ever since, joined over the years by Bobcat excavators and trenchers, utility trucks and more. Bobcat Fifty Years chronicles the changes and innovations that have kept the company at the forefront of the nation’s compact machinery makers—from the invention of the Bob-Tach quick-change attachment system to the introduction of the Big Bob, the Mini-Bob, and the M-700, the first hydrostatic loader of its size. Here, again and again, is evidence of why Fortune Magazine named the Bobcat one of “America’s best”—one of the 100 American-made products that represent the best of their kind, anywhere in the world.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America’s most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners’ clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson’s compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Over 30,000 Construction Costs on Every Area of Construction! The National Construction Estimator is our most popular book for pricing construction, and has been for years. It has proven to be the industry standard for construction costs. Here's why: Material Costs: You'll find the current cost of every commonly-used construction material and thousands of specialties...based on typical selling prices of building material dealers. Labor Costs: Typical costs to the contractor (including taxes and insurance) to install each of the thousands of materials listed...along with typical manhours per unit. Wage modifications are listed for nearly every city plus most Canadian provinces. Wage breakdowns by trade are listed for 24 construction trades. Subcontract Costs: Bid prices most frequently quoted by specialty contractors...including the sub's overhead and profit. FREE CD-ROM: Includes an electronic version of the book with a stand-alone estimating program & tutorial and price updates
