From doing the Dancing Spaghetti Lab, I learned that if you mix  
water, vinegar, and baking soda, it create CO<sub>2</sub> bubbles. I found a  
number of things to be interesting. For example, I found that the  
water and vinegar solution fizzes up when you add baking soda to  
it; also that amateur video editing is quite time consuming (trying to  
figure out the features ie: sound, brightness, filters, etc.), yet

"This book contains sixty activities, many of which can be used by teachers of all grades. Teachers and parents with little or no background in science or chemistry can understand and conduct these activities. Students can do them, too, if supervision is provided. The catchy title of each activity and the 'magic show' approach are meant to capture attention, arouse curiosity, and dispel chemophobia" -- Preface, v.

Join Bartholomew Cubbins in Dr. Seuss's Caldecott Honor-winning picture book about a king's magical mishap! Bored with rain, sunshine, fog, and snow, King Derwin of Didd summons his royal magicians to create something new and exciting to fall from the sky. What he gets is a storm of sticky green goo called Oobleck—which soon wreaks havoc all over his kingdom! But with the assistance of the wise page boy Bartholomew, the king (along with young readers) learns that the simplest words can sometimes solve the stickiest problems.

(THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE □ ONE OF ESSENCE'S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS □ WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review □ Entertainment Weekly □ O: The Oprah Magazine □ NPR □ Financial Times □ New York □ Independent (U.K.) □ Times (U.K.) □ Publishers Weekly □ Library Journal □ Kirkus Reviews □ Booklist □ Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine,

why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Charlie struggles to cope with complex world of high school as he deals with the confusions of sex and love, the temptations of drugs, and the pain of losing a close friend and a favorite aunt.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

It is 1982 and Jennie Samantha Williamson, Marilyn Monroe's nineteen-year-old future daughter, has inherited her mother's addiction to Nembutals. When she discovers the Time Bubble's Golden Key in a table beside her mother's bed, she makes plans to travel back in time to 1971 in an attempt to stop a chain of events that culminated in an undersea disaster. But first, Jennie must travel to September 15, 1954 in New York City, where Marilyn Monroe is filming the Seven Year Itch. After she persuades her mother that she is her future daughter and that time travel is possible, she still must convince Marilyn to travel ahead in time seventeen years to dive once again into Santa Monica Bay, hopefully changing fate in the process. Meanwhile as Marilyn and her future husband travel to 2068 to explore an underground city and search for a time machine's sketches, Jennie knows the secret to stopping the 1971 underwater disaster lies in the palm of her future mother's hand—but only if she can safely transport Marilyn back to 1971 from 2068 before the Sentinels of the System hunt down and kill all three for their defiance.
