Death by Food Pyramid is not a pro-Paleo book per se, although the Paleo diet (as most commonly implemented to include healthful nutrient-dense animal fats and embracing starchy roots and tubers) is consistent with Denise's evaluations and recommendations. Instead, this is a book about science, policy, the dissemination of information, and the value of critical thinking and common sense.

Death by Food Pyramid contains so many highlights, so much good information, and gets so many things right, it is hard to review it without wanting to reproduce it. From the skewed science and agenda-driven government agencies to the confused and confusing experts and their contradictory and confounded studies and suggestions, page after page exposes the unfolding history of diet in the second half of the twentieth century in all its tragic madness and folly.

"Death By Food Pyramid" is a solid book on the origins and effects of the Eat Less Fat and More Grains dogma trumpeted since the 1920's. The popularity of Crisco, for example, was the result of intense marketing, despite research showing these new "trans fats" weren't all that great a replacement for the pastured lard and creamy butter we were used to.

In Death By Food Pyramid, Denise Minger criticizes the federal dietary guidelines, such as those to restrict dietary cholesterol and saturated fat, not so much due to a lack of high quality suggestive evidence, but due to the lack of unequivocal evidence. At the same time, Minger fails to provide any unequivocal evidence to support her own dietary recommendations, recommendations that she seems to suggest should be adopted into the federal guidelines.
