The critical century between the arrival of Constantine and the advance of Alaric in the early fifth century witnessed dramatic changes in the city of Rome. In this book Dr. Curran has broken away from the usual notions of religious conflict between Christians and pagans, to focus on a number of approaches to the Christianization of Rome. He surveys the laws and political considerations which governed the building policy of Constantine and his successors, the effect of papal building and commemorative constructions on Roman topography, the continuing

ambivalence of the Roman festal calendar, and the conflict between Christians over asceticism and "real" Christianity. Thus using analytical, literary, and legal evidence Dr Curran explains the way in which the landscape, civic life, and moral values of Rome were transformed by complex and sometimes paradoxical forces, laying the foundation for the capital of medieval Christendom. Through a study of Rome as a city Dr Curran explores the rise of Christianity and the decline of paganism in the later Roman empire.

Since the 1960s a fresh wave of new religions and what has come to be termed 'spiritualities' have been evident on a global scale.

This volume in The Library of Essays on Sexuality and Religion focuses on these 'new' religions and their often contentious attitudes towards human sexuality. Part 1, through previously-published articles, provides instances of affirming orientations of the 'new' religions towards sexuality. This entails scrutinising examples of innovative religion from a historical perspective, as well as those of a more contemporary nature. Part 2 examines, with pertinent illustrations, the controversial character of 'new' religions in their 'cultist' forms and matters of sexual control and abuse. Part 3 considers sexuality as articulated through paganism, the occult and esotericism in the postmodern

setting. Part 4 examines both hetero- and non-hetero-expressions of sexuality through the so-called 'New Spiritualities', Quasi-religions and the more 'hidden' forms of religiosity.

The history of American Paganism - with so many invented lineages, so many solitary practitioners, so much resistance to staid definition, so much hiddenness - can be hard to decipher. But in *Her Hidden Children*, author Chas S. Clifton relates many never-before-told stories of the origins of Paganism and Wicca in the United States, describing the people, publications,

and organizations that allowed Paganism and Wicca to take root and become "nature religion." With a timeline, glossary, and photos of important figures, Her Hidden Children is important for any student of Paganism or American religion.

referred to it as the "best-kept secret" in history. Did the Ancient Greeks use drugs to find God? And did the earliest Christians inherit the same, secret tradition? A profound knowledge of visionary plants, herbs and fungi passed from one generation to the next, ever since the Stone Age? There is zero archaeological evidence for the original Eucharist – the sacred wine said to guarantee life after death for those who drink the blood of Jesus. The Holy Grail and its miraculous contents have never been found. In the absence of any hard data, whatever happened at the Last Supper remains an article of faith for today ' s 2.5 billion Christians. In an unprecedented search for answers, The Immortality Key examines the

archaic roots of the ritual that is performed every Sunday for nearly one third of the planet. Religion and science converge to paint a radical picture of Christianity ' s founding event. And after centuries of debate, to solve history ' s greatest puzzle. Before the birth of Jesus, the Ancient Greeks found salvation in their own sacraments. Sacred beverages were routinely consumed as part of the so-called Ancient Mysteries – elaborate rites that led initiates to the brink of death. The best and brightest from Athens and Rome flocked to the spiritual capital of Eleusis, where a holy beer unleashed heavenly visions for two thousand years. Others drank the holy wine of Dionysus to become one with

the god. In the 1970s, renegade scholars claimed this beer and wine – the original sacraments of Western civilization – were spiked with mind-altering drugs. In recent years, vindication for the disgraced theory has been quietly mounting in the laboratory. The constantly advancing fields of archaeobotany and archaeochemistry have hinted at the enduring use of hallucinogenic drinks in antiquity. And with a single dose of psilocybin, the psychopharmacologists at Johns Hopkins and NYU are now turning self-proclaimed atheists into instant believers. But the smoking gun remains elusive. If these sacraments survived for thousands of years in our remote prehistory, from the Stone Age to the Ancient

Greeks, did they also survive into the age of Jesus? Was the Eucharist of the earliest Christians, in fact, a psychedelic Eucharist? With an unquenchable thirst for evidence, Muraresku takes the reader on his twelve-year global hunt for proof. He tours the ruins of Greece with its government archaeologists. He gains access to the hidden collections of the Louvre to show the continuity from pagan to Christian wine. He unravels the Ancient Greek of the New Testament with the world ' s most controversial priest. He spelunks into the catacombs under the streets of Rome to decipher the lost symbols of Christianity ' s oldest monuments. He breaches the secret archives of the Vatican

to unearth manuscripts never before translated into English. And with leads from the archaeological chemists at UPenn and MIT, he unveils the first scientific data for the ritual use of psychedelic drugs in classical antiquity. The Immortality Key reconstructs the suppressed history of women consecrating a forbidden, drugged Eucharist that was later banned by the Church Fathers. Women who were then targeted as witches during the Inquisition, when Europe ' s sacred pharmacology largely disappeared. If the scientists of today have resurrected this technology, then Christianity is in crisis. Unless it returns to its roots. Christian eschatology and traces the Hellenistic roots of Christian consolation philosophy. The author examines Christianity as a 'total therapy of grief' and highlights the differences that existed between the religious cures and the Hellenistic philosophical therapies. To gain a better understanding of the process of conversion to the new faith Antigone Samellas also investigates which aspects of Christianity were appealing and which repugnant in the eyes of pagans and Jews. Finally, she attempts to convey something of the wisdom of the East, in all its cultural and religious nuances, to the modern reader.
