## Critical Care Designs

The traditional design of critical care units has been influenced by reliance on a single paper medical record, central monitors, and regulations promoting a single, centrally located workstation from which all beds within the unit can be observed. These conditions are changing as information systems allow the digital record to be in multiple places at once, interdisciplinary care teams become more prevalent, nursing

The COVID-19 ICU Design Award honors a critical care unit that was built or heavily modified from late 2019 through May 2020 to expand ICU bed capacity. The ICU design should be configured to provide care for COVID-19 patients as well as to ensure staff safety. This new award, available in 2020 only, has been conceived to identify and recognize a critical care unit that might not
