Revised and updated May 2012. In this revised and updated edition of Steven Landsburg's hugely popular book, he applies economic theory to today's most pressing concerns, answering a diverse range of daring questions, such as: Why are seat belts deadly? Why do celebrity endorsements sell products? Why are failed executives paid so much? Who should bear the cost of oil spills? Do government deficits matter? How is workplace safety bad for workers? What's wrong with the local foods movement? Which rich people can't be taxed? Why is rising unemployment sometimes good? Why do women pay more at the dry cleaner? Why is life full of disappointments? Whether these are nagging questions you've always had, or ones you never even thought to ask, this new edition of *The Armchair Economist* turns the eternal ideas of economic theory into concrete answers that you can use to navigate the challenges of contemporary life.

Can economics be passionate?... Can it center on people and what really matters to them day-in and day-out.... And help us understand their hidden motives for why they do what they do in everyday life? Uri Gneezy and John List are revolutionaries. Their ideas and methods for revealing what really works in addressing big social, business, and economic problems gives us new understanding of the motives underlying human behavior. We can then structure incentives that can get people to move mountains, change their behavior—or at least get a better deal. But finding the right incentive can be like looking for a needle in a haystack. Gneezy and List's pioneering approach is to embed themselves in the factories, schools, communities, and offices where people work, live, and play. Then, through large-scale field experiments conducted "in the wild," Gneezy and List observe people in their natural environments without them being aware that they are observed. Their randomized experiments have revealed ways to close the gap between rich and poor students; to stop the violence plaguing inner-city schools; to decipher whether women are really less competitive than men; to correctly price products and services; and to discover the real reasons why people discriminate. To get the answers, Gneezy and List boarded planes, helicopters, trains, and automobiles to embark on journeys from the foothills of Kilimanjaro to California wineries; from sultry northern India to the chilly streets of Chicago; from the playgrounds of schools in Israel to the boardrooms of some of the world's largest corporations. In *The Why Axis*, they take us along for the ride, and through engaging and colorful stories, present lessons with big payoffs. Their revelatory, startling, and urgent discoveries about how incentives really work are both revolutionary and immensely practical. This research will change both the way we think about and take action on big and little problems. Instead of relying on assumptions, we can find out, through evidence, what really works. Anyone working in business, politics, education, or philanthropy can use the approach Gneezy and List describe in *The Why Axis* to reach a deeper, nuanced understanding of human behavior, and a better understanding of what motivates people and why.

The past fifty years have witnessed the triumph of an industrial development that has engendered great social and environmental costs. Conventional economics has too often either ignored these costs or failed to analyse them appropriately. This book constructs a framework within which the wider impacts of economic activity can be both understood and ameliorated. The framework places its emphasis on an in-depth understanding of real-life processes rather than on mathematical formalism, stressing the independence of the economy with the social, ecological and ethical dimensions of human life.

Provides a comprehensive explanation of how the economy works while examining the roots of the current crisis and offering advice to prevent future meltdowns.
