An A/C fan control module helps to control the blower that supplies air to the cabin of a vehicle, as well as the cooling fans. The module helps to make sure that the cool air that is produced within the A/C system of a car is blown into the cabin. The A/C fans that are mounted in near the radiator of the car are also controlled by this module.

The driver can control the power of the interior blower. Due to the fact that at high power levels of noise is very high, for continuous operation is mainly the lower level. If the interior blower is defective, this may affect on different car parts. A complete loss of function, however, can have many causes.
