From the introduction: So I would commend these formative writings of Fritz Perls to those who would get a fuller sense of the original ideas of Gestalt therapy, a work in progress, but already a fairly consistent field-relational approach to psychology and therapy. My hope is that, with more people reading these papers and our 'Bible, ' Perls, Hefferline and Goodman,

The *Betrayal of the Body* is Alexander Lowen's pioneering study of the mind-body split. Lowen describes the way people deny the reality, needs, and feelings of their bodies. This denial leads to the development of the division between mind and body, creating an over-charged ego obsessed with thinking at the expense of feeling and being. This book illustrates the energetic factors behind the split, the factors that produce it, and the proven therapeutic techniques that are available to treat it. Lowen further explores the mind-body duality in the individual and its parallel duality and dysfunction in society between culture and nature, and between thinking and feeling.

Part of the Key Figures in Counselling and Psychotherapy series, this text chronicles the life, contributions and influence of Fritz Perls on the practice of counselling and psychotherapy.

The book is unique in that it is the first Gestalt text specifically designed for the academic and training institute settings. *Gestalt Therapy* takes both a conceptual and a practical approach to
