An option is a contract that allows (but doesn't require) an investor to buy or sell an underlying instrument like a security, ETF or even index at a predetermined price over a certain period of...

What Is Options Trading? Examples and Strategies - TheStreet

In finance, an option is a contract which conveys its owner, the holder, the right, but not the obligation, to buy or sell an underlying asset or instrument at a specified strike price prior to or on a specified date, depending on the form of the option. Options are typically acquired by purchase, as a form of compensation, or as part of a complex financial transaction. Thus, they are also a form of asset and have a valuation that may depend on a complex relationship between underlying asset val

Option (finance) - Wikipedia

OTC options are exotic options that trade in the over-the-counter market rather than on a formal exchange like exchange traded option contracts. OTC options are the result of a private transaction...
