Only a few books stand as landmarks in social and scientific upheaval. Norbert Wiener's classic is one in that small company. Founder of the science of cybernetics—the study of the relationship between computers and the human nervous system—Wiener was widely misunderstood as one who advocated the automation of human life. As this book reveals, his

vision was much more complex and interesting. He hoped that machines would release people from relentless and repetitive drudgery in order to achieve more creative pursuits. At the same time he realized the danger of dehumanizing and displacement. His book examines the implications of cybernetics for education, law, language, science, technology, as he anticipates the enormous impact—in effect, a third industrial revolution—that the computer has had on our lives.

When faced with productivity problems in the workplace, engineers might call for better machines, and management might call for better-trained people, but ergonomists call for a better interface and better interaction between the user and the machine. *Introduction to Ergonomics, 2nd Edition*, provides a comprehensive introduction to ergonomics as the study of the relationship between people and their working environment. The author presents evidence from field trials, studies and experiments that demonstrate the value of ergonomics in making the workplace safer, more error resistant, and compatible with users' characteristics and psychological and social needs. Evidence for the effectiveness of each topic is incorporated throughout the book as well, which helps practitioners to make the case for company investment in ergonomics. In addition, the author outlines international standards for ergonomics that influence engineering and design and pave the way for a more precise form of practice. Extensively revised and updated, this second edition explains the main areas of application, the science that underpins these applications, and demonstrates the cost-effectiveness of implementing the applications in a wide variety of work settings.

Northwest of Manhattan where the New York-New Jersey boundary crosses the tree-covered ridges and hollows ridges and hollows of the Ramapo Mountains there is a group of about 1,500 racially mixed people who have long been referred to by journalists and historians as the "Jackson Whites." In a study combining the disciplines of anthropology, sociology, folklore, and history, David Cohen found that the old stories about these people were legends, not history. He found no reliable evidence that their ancestors were Tuscarora Indians, Hessian deserters from the British army, escaped slaves, and British and West Indian prostitutes imported by a sea captain named Jackson for the pleasure of British soldiers occupying Manhattan during the War for Independence. David Cohen lived among the Ramapo Mountain People for a year, conducting genealogical research into church records, deeds, wills, and inventories in county courthouses and libraries. He established that their ancestors included free black landowners in New York City and mulattoes with some Dutch ancestry who were among the first pioneers to settle in the Hackensack River Valley of New Jersey. In describing his findings and his experiences, Professor Cohen shows how their racially mixed ancestry, their special family and kinship system, and their intergroup attitudes and folkways distinguish and socially isolate these people as a separate racial group today, despite modern communications and transportation and their proximity to New York City.

A stunning debut WWII novel from award-winning short story writer Michelle Wright, about the small but courageous acts a young woman performs against the growing anti-Jewish measures in Nazi-occupied Paris. "Doing nothing is still a choice. A choice to stand aside and let it happen." January 1940: After a devastating tragedy, young Australian woman Lucie and her mother Yvonne are forced to leave home and flee to France. There they seek help from the only family they have left, Lucie's uncle, Gérard. As the Second World War engulfs Europe, the two women find themselves trapped in German-occupied Paris, sharing a cramped apartment with the authoritarian Gérard and his extremist views. Drawing upon her artistic talents, Lucie risks her own safety to engage in small acts of defiance against the occupying Nazi forces and the collaborationist French regime - illustrating pro-resistance tracts and forging identity cards. Faced with the escalating brutality of anti-Jewish measures, and the indifference of so many of her fellow Parisians, Lucie must decide how far she will go to protect her friends and defend the rights of others before it's too late.
