The Seventh Edition of Reading for Thinking, the most advanced text in my three-book series, still assumes that critical reading is not something completely separate from comprehension. As in previous editions, students learn how to expand their idea of comprehension until it includes recognizing purpose; determining tone; and evaluating evidence, logic, and bias.

instruction and who teach college reading through the use of readings from across the disciplines. To prepare students for the expectations of higher education, Kathleen McWhorter uses high-interest readings from a variety of academic sources and provides concise reading skills with immediate practice for reinforcement. Discipline-specific reading skills offer tips for reading and learning within the particular discipline, so students learn content as well as strategy.

Appropriate for courses in college reading, this text is a four-genre anthology -- poetry, short stories, essays, and textbook chapters. New pieces from ethnically diverse authors have been added throughout the book, including writers such as Zora Neale Hurston, Eudora Welty, and Reginald McKnight. All of the exercises and

pedagogy are found in the instructor's manual, not in the student text. The instructor's manual contains fully developed exercises on each piece in the book, an essay on teaching students to read textbook chapters, and transparency masters with examples of outlining. The instructor's manual also suggests ways of using the selections to improve reading skills and critical thinking. This facilitates flexible use in the classroom.

Study and Critical Thinking Skills in College integrates study and critical thinking skills as a means of helping students achieve academic success. Teaching studying through active learning strategies and techniques, the author emphasizes the cognitive approach to learning, how to apply study skills to academic disciplines, and how to identify early warning signs of academic

difficulty.

Critical Thinking is a comprehensive and accessible introduction to the essential skills of good reasoning, written by Canadian authors for Canadian readers. The book includes a thorough treatment of such central topics as deductive and inductive reasoning, logical fallacies, how to recognize and avoid ambiguity, and how to distinguish what is relevant from what is not. Later chapters discuss the application of critical thinking skills to particular topics and tasks, including scientific reasoning, moral reasoning, legal reasoning, media analysis, and essay writing. The book also provides access to a companion website containing additional questions, flashcards, and other useful critical thinking resources.

Incorporating a wealth of practice exercises and high-interest readings, *READING FOR THINKING, International Edition* focuses on improving reading skills at the “micro-level” and moving on to the “macro-level.” Over half of the book is devoted to evaluating, drawing inferences, and identifying tone, bias, and purpose. The Seventh Edition continues to focus on developing students’ comprehension and critical-thinking skills. Flemming uses a carefully designed sequence of explanations and exercises that allows students to approach critical reading as a natural extension of essential comprehension skills, rather than a discrete set of new strategies. Armed with the ability to both analyze and evaluate a writer’s work, students apply those twin intellectual tools to Flemming’s trademark high-interest readings to determine purpose, analyze evidence, detect bias, recognize tone, and compare

interaction. The text explores communication in a variety of traditional contexts: interpersonal, group, organizational, public, intercultural, computer-mediated communication and the mass media. This edition also offers new insights into public speaking and listening. This text can be used successfully in both theory- and skills-based courses. Written in a clear, lively style, Trenholm's overall approach-including her use of examples and interesting illustrations-helps both majors and non-majors alike develop a better understanding of communication as a field of study and an appreciation for ways in which communication impacts their daily lives.

Stresses the importance of argumentation in everyday life

skills in constructing and refuting arguments in contexts ranging from informal conversations to structured debates. The authors stress the importance of argumentation in everyday life while building student competence and critical awareness. Through exercises and examples, students learn to create arguments and develop, understand, and interpret extended cases. MySearchLab is a part of the Inch/Tudor program.
