The most popular hobby in the world, stamp collecting has millions of fans in the United States alone. Many are adults who have turned a childhood interest in philately into a pleasurable (and often profitable) lifetime avocation. This volume has everything needed to start a personal stamp collection: Entries for nearly 200 countries; Spaces for more than 2,600 stamps; Over 1,100 black-and-white illustrations of stamps; Easy-to-use Stamp Identifier Table and Index. Clear instructions for using the album and the Stamp Identifier Table are included, along with many useful hints and tips on building a collection. An entertaining, inexpensive way to learn about faraway people and places, stamp collecting brings a sense of excitement and adventure with each new acquisition. This book offers would-be collectors that ticket to discovery.

This is a comparative analysis of the dominant ideologies and modes of legitimization in communist and post-Communist Serbia and Croatia. The aim of the book is to identify and explain dominant normative and operative ideologies and principal modes of legitimization in these three case studies. The book is based on the content analysis of manifestos of the ruling parties in post World War II Yugoslavia (League of Communists), post-Cold War Serbia (Socialist Party of Serbia) and Croatia (Croatian Democratic Union), as well as on the content analysis of the school textbooks and editorial of government-controlled newspapers published in the same period. By analyzing the way state apparatuses work, the author aims to demonstrate the crucial role that ideology plays in the underpinning of the identity transformation in these three societies. At the same time, an attempt is made to develop an adequate theoretical model of ideology and political legitimization that would not only help explain the extraordinary situation of these three cases but would also contribute to the general theory of ideology and legitimization.

Pick up an old stamp album and flick through it. You'll find a host of exotic and unfamiliar names: Cyrenaica, Fernando Poo, Fiume, North Ingria, Obock, Priamur, Stellaland, Tuva, Wenden - distant lands, vanished territories, lost countries. Do they still exist? If not, where were they? What happened to them? *Lost Countries* goes in search of the truth about these and many other amazing places. Stuart Laycock and Chris West unearth stories of many kinds. Some take you to long-disappeared empires; others throw light on today's most pressing conflicts. *Lost Countries* invites you to enjoy them all, in a collection of historical narratives as broad and enticing as an old stamp album that you've just discovered in the attic.

Includes special issues.

Ecclesiology (the theology of the church) is a neglected topic in contemporary theology. At a time when the institutional churches are experiencing dramatic decline, says Michael Jenkins, we need a new understanding of what the church is. In this work, Jenkins challenges the church to rediscover its vocation, to follow Jesus Christ even at the risk of its institutional survival. In the face of a variety of perceived threats to its future, he reminds us that the church is most alive and attractive when it forgets about itself and its safety. The ecclesiology Jenkins puts forward is born from a sense of "life in Christ" that can, he argues, face institutional death to recover a remarkable freedom. Without detailing the face of the future church, he asserts his faith that there is indeed life after death for the church as the worshipping body of Christ.
